10.00-13.00**

**SYMPOSIUM  
“INNOVATIONS IN EDUCATION  
OF CHILDREN AND YOUTH WITH DISABILITIES”**

**(Meeting room 1)**

---

## Introduction

---

Today, increasingly more attention is paid to the professional education of people with disabilities. Adapted educational programs are being developed and regional resource training and methodological centers are being established. Teachers undergo advanced training courses. Distance learning technologies are being created and are actively developing. Undoubtedly, the effectiveness of developing and introducing new technologies and approaches depends on the impact of new information technologies on the mental development of students. Today, many problems and difficulties are caused by Internet addiction. In this regard, the development of vitality and self-activation of persons with disabilities, the training of specialists in online psychological counseling for children and youth with disabilities and health limitations are of particular significance.

---
