The legendary author's workshop has been held since 1990. The requests of the participants change as time passes, and so does the workshop.

*We did not choose our profession because of money. We are determined to help people. Once again money catches our attention. Money is often tight, and the things we can exchange it for are getting more and more expensive right in front of our eyes. Money gets cheaper, though becomes increasingly costly for us. We have less and less money on hand. The workshop brings in the awareness about the proper attitudes towards money and skills of earning it, spending it, saving it and multiplying it. The workshop shows different roles of money in childhood, young, adult and elderly age. It gives the participants understanding on how to build up the entire life of a mental health professional on how to be healthy, successful and happy in this time of turbulent changes! **

** It is important to bring cash, the amount of which is sufficient for your personal growth, a notepad and a pen.*
