

## **CONGRESS HALL 1 6 OCTOBER (SATURDAY)**

### **International Conference “PROFESSIONAL EDUCATION IN MENTAL HEALTH” (Congress Hall 1)**

---

#### **Introduction**

---

Nowadays efficient operation of the mental health system in any country has specific demands for professional education in various fields of medical and non-medical specialties. The importance of graduate and post-graduate education corresponding to the highest standards and the latest achievements of modern sciences is growing every year. It is certainly acknowledged that professional education should be interdisciplinary-based and should ensure maximum compliance with the biopsychosocial model of mental disorders and the human personality. The latter is possible only on the basis of continuous medical education, as well as continuous professional development of non-medical professionals working in the field of mental health, with account of both national and generally accepted international standards for the provision of highly qualified types of care.

---

#### **Goals and Objectives**

---

**The Conference is aimed at developing approaches to improving the quality of professional education in mental health.**

- Analysis of modern trends in the development of professional education in the field of mental health, with account of the relevance of interdisciplinary and intersectoral interaction between psychiatry, general medicine and related specialties, including non-medical ones.
- Discussion of possibilities and problems of the standardization of professional education in mental health.
- Discussion of problems and prospects of continuous medical education in combination with the educational process in related specialties, including the non-medical ones.
- Presentation of the best regional approaches to the organization and development of the professional education in mental health
